DETAILED ACTION

Double Patenting

1. Applicant is advised that should claims 12-16 be found allowable, claims 17-21 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1, 4-6, 9, and 12-21 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6105150 to Noguchi et al. The body of this rejection can be found in the prior office action.

Allowable Subject Matter

4. Claims 2, 3, 7, 8, 10, and 11 are allowed.

Response to Arguments

5. Applicant's arguments filed 7 July 2004 have been fully considered but they are not persuasive. Regarding Applicant's argument that 112 6th paragraph was invoked in claim 17 and not in claim 12, Examiner understands the means plus function language provides the same or equivalent device that fulfills the function, however, these two claims still have substantial duplication of claimed subject matter. If Applicant pursues the prosecution of both sets of claims,

Art Unit: 2114

Applicant must show the difference in claimed subject matter, e.g., the difference in the devices used to fulfill the functionality.

Regarding Applicant's argument that Applicant's invention encompass an error table listing *error types* as opposed to the teachings of Noguchi et al. which encompass an error table listing the actual error that has occurred, a specific error encompasses a type of error, which is a more broad description of the error. Further, a type of error may be specific or it may be broad, neither of which is claimed to any degree of specificity. In this view, anyone who has claimed a specific error has simply claimed a specific error type. Moreover, Noguchi et al. describe the stored information as storing information about whether an error has occurred in a control unit in a computer or in a control unit in a communications card, and that further, dump information is collected only when it corresponds to the control unit (see the abstract). In other words, these errors are at least of a type identified by the control unit, e.g., a computer control unit error or a communications card control unit error.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory

action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
